

LIKHITH RUDRESH

Quality & Operations Engineer | Continuous Improvement & Supply Chain

linkedin.com/in/likhithrudresh | rlikhith02@gmail.com | +46 727 727 661 | Gothenburg, Sweden

PROFILE SUMMARY

Structured, detail-driven approach to quality and process problems, with hands-on experience across applied research, manufacturing quality, and process improvement. Led FMEA-based risk analysis adopted by engineering teams, reviewed manufacturing documentation against quality requirements, and applied structured DMAIC problem-solving to a regulated-manufacturing improvement project that cut lead time 56% and workload 67%. Actively seeking quality, continuous improvement, and supply chain opportunities across Sweden and Europe; open to relocation.

EXPERIENCE

RISE Research Institutes of Sweden Gothenburg Jan 2026 – Jul 2026
Student Researcher (Master Thesis)

- Structured a 3-phase, 6-month applied research programme across 5 Stage-Gate milestones (requirements specification, technology evaluation, and process recommendations) for cross-functional engineering stakeholders
- Led FMEA-based risk analysis and documentation across 6 failure modes (RPN-ranked), translating findings into corrective-action priorities and a continuous improvement governance framework adopted by engineering teams

Thermax Limited Bengaluru, India Feb 2024 – Apr 2024
Manufacturing Quality and Process Intern

- Performed quality inspections and coordinated corrective actions with manufacturing teams per ISO 9001 and EHS requirements
- Mapped production flow and drove root cause analysis to identify and reduce process waste
- Built supplier performance dashboards tracking delivery, capacity utilisation, and manufacturing KPIs; supplier development recommendations adopted directly by management

PROJECTS

Six Sigma DMAIC Lean Process Development Student Project with Cepheid AB · Gothenburg, Sweden Jan 2025 – Aug 2025
Academic project, Chalmers University of Technology

- Applied DMAIC to a production process in a regulated manufacturing environment: value stream mapping, cycle time analysis, and waste identification, with process trials monitored via SPC and OEE
- Results: lead time reduced from 20.5 to 9 weeks (a 56% reduction) and team workload reduced by 67%
- Coached team members on Lean tools, built KPI dashboards in Power BI and Excel, and wrote the governing SOPs

SKILLS

Quality & Continuous Improvement: Lean Six Sigma, Six Sigma DMAIC, Continuous Improvement, Root Cause Analysis, FMEA, SPC, OEE, Lean Manufacturing, Process Improvement, DOE, Kaizen, 5S, CAPA

Operations & Supply Chain: Value Stream Mapping, Lead Time Reduction, KPIs, Stage-Gate, Supplier Performance Management, Stakeholder Management, Team Leadership

Quality Systems: ISO 9001, Quality Inspection, Risk Analysis, SOPs

Data and Tools: Power BI, Excel, JMP, SAP ERP, Python, Siemens NX, Solid Edge, MS Office

Languages: English (Professional Proficiency) · Swedish (Elementary)

EDUCATION

Chalmers University of Technology, Sweden Aug 2024 – Aug 2026
MSc, Quality and Operations Management

Courses: Lean Production, Operations Management, Quality Engineering, Statistical Methods, Risk Management

Global Academy of Technology, India Jan 2020 – Jun 2024
BE, Mechanical Engineering

Courses: Total Quality Management, Manufacturing Processes, Manufacturing Measurements and Metrology

CERTIFICATIONS

- Six Sigma Black Belt course, Chalmers University of Technology (in progress)
- 1st place of 40+ participants, Lean Development Game, Chalmers University of Technology, 2024

LEADERSHIP AND VOLUNTEERING

Phadder Manager (Volunteer), Chalmers International Reception Committee (CIRC) Nov 2024 – Dec 2025

- Led the phadder (student mentor) programme, coordinating volunteer teams that onboarded 1,000+ international students each semester
- Planned and executed reception logistics across 10+ parallel workstreams under firm deadlines
